Securing the Internet of Things Forum

February 24, 2014

The Internet of Things (IOT) is the term for the phenomenon where people and things (physical devices such as vehicles, commercial and industrial equipment, medical devices, remote sensors, etc.) are connected to networks that are linked to the Internet and communicating vast amounts of valuable data. While the idea is not new, the recent proliferation creates a sense of urgency to better understand, manage and consume the resulting data.

Leading innovators, investors, and executives will explore the Internet of Things and the implications for new approaches in thinking by government, business, and individuals regarding privacy and security across these widely distributed networks and the resulting amounts of data.

AGENDA

- 3:15 pm – 3:45 pm Registration
- 3:45 pm – 4:00 pm Welcome: Robert Rodriguez, Chairman & Founder, *Security Innovation Network (SINET)*
- 4:00 pm – 4:10 pm Introduction: Darin Andersen, President & CEO, *CyberUnited*, Chairman & Founder, *CyberTECH & CyberHive*
- 4:10 pm – 4:20 pm Asheem Chandna, Investor & Company Builder, Partner, *Greylock Partners*
